## AGRI SERVICES

Reg no 2008/015626/07

NCRCP 3734

### Who is Temo Agri Services?

It's a fact that farmers and farming businesses face various challenges and their individual needs are unique. Temo Agri Services assist emerging and subsistence farmers with the challenges they face in the farming industry, through a process of mentorship and guide them on their way to becoming commercial farmers. Temo was established in 2003, as a division of the MGK Group of Companies, with their head office situated in Brits, North West Province.

At Temo we realise that emerging farmers are faced with challenges and that their needs are not met by the existing commercial business environment. Some of these challenges includes access to:

- proper farming equipment,
- financial resources,
- information,
- skills,
- markets,
- insurance.

### What does Temo Agri Services offer?

Temo Agri Services acts as a coordinator of resources (equipment, skills, knowledge, experience etc.) to ensure that all the necessary aspects of farming are planned

and strategised with the farmer, in other words, they ensure that the right things are done at the right time, in the right way, with the right equipment. Our skilled and knowledgeable mentors, most of them experienced farmers, are the key to both Temo and the farmer's success.

### How does the Temo programme work?

Temo farmers from a common geographical area, are grouped together to form study groups. Their challenges, needs and concerns are discussed in these study groups in collaboration with the mentors. Based on their knowledge and specific fields of expertise the mentors then make specific recommendations and also assist the farmers with the implementation thereof.

### Why is Temo offering this service?

A lot of areable agricultural land is not being used to its full economical potential and financial institutions do not usually extend funds to farmers who have little or no collateral to offer. Temo evaluated this situation and decided that alternative ways of addressing these risks needs to be explored. In doing so, Temo now plays a major role in local economic development through social responsibility and the creation of job opportunities and ultimately a future for people previously excluded from opportunities offered by the current economic environment.

Unproductive agricultural land can now be utilised to create job opportunities and income, which improves chances of economic development. Servicing this emerging market, also enlarges MGK Group of Companies platform for its products and services.

### How can Temo Agri Services help me?

If you have access to land and have what it takes to be a good farmer, here are some of the requirements that you must meet to apply for farming assistance:

- Have a vested interest in farming and agriculture.
- Have access to areable land.
- Be in possession of a valid South African Identification Document.
- Deliver proof of outstanding debts.
- Deliver proof of residence.
- Deliver proof of income if you are a salary earner.

Contact Temo Agri Services today to explore the opportunity for economical advancement and a sustainable future for you and your children in South Africa.
